Notice to Readers

Though the guidelines and procedures contained in this text are based on consultations with healthcare professionals, they should not be considered absolute recommendations. The instructor and readers should follow employer, local, state, and federal guidelines concerning healthcare practices. These guidelines change, and it is each reader's responsibility to be aware of these changes and of the policies and procedures of their healthcare facility.

The publisher, authors, editors, and reviewers cannot accept any responsibility for errors or omissions or for any consequences from application of the information in this book and make no warranty, express or implied, with respect to the contents of the book. The publisher does not warrant or guarantee any of the products described herein or perform any analysis in connection with any of the product information contained herein.

Gender Usage

This textbook uses gender pronouns interchangeably to denote healthcare team members and residents.

Contents

	<i>Page</i>	<i>Learning Objective</i>	<i>Page</i>
1 Understanding Healthcare Settings			
1. Discuss the structure of the healthcare system and describe ways it is changing	1	4. Discuss abuse and neglect and explain how to report abuse and neglect	25
2. Describe a typical long-term care facility	4	5. List examples of behavior supporting and promoting Residents' Rights	28
3. Describe residents who live in long-term care facilities	4	6. Describe what happens when a complaint of abuse is made against a nursing assistant	29
4. Explain policies and procedures	5	7. Explain how disputes may be resolved and identify the ombudsman's role	29
5. Describe the long-term care survey process	6	8. Explain HIPAA and list ways to protect residents' privacy	30
6. Explain Medicare and Medicaid	6	9. Explain the Patient Self-Determination Act (PSDA) and discuss advance directives and related medical orders	32
7. Discuss the terms <i>culture change</i> , <i>person-centered care</i> , and <i>trauma-informed care</i>	7		
2 The Nursing Assistant and the Care Team			
1. Identify the members of the care team and describe how the care team works together to provide care	9	4 Communication and Cultural Diversity	
2. Explain the nursing assistant's role	11	1. Define <i>communication</i>	34
3. Explain professionalism and list examples of professional behavior	12	2. Explain verbal and nonverbal communication	35
4. Describe proper personal grooming habits	14	3. Describe how culture may influence communication	36
5. Explain the chain of command and scope of practice	15	4. Identify barriers to communication	36
6. Discuss the resident care plan and explain its purpose	16	5. List ways to make communication accurate and explain how to develop effective interpersonal relationships	38
7. Describe the nursing process	17	6. Explain the difference between facts and opinions	40
8. Describe the <i>Five Rights of Delegation</i>	18	7. Explain objective and subjective information and describe how to observe and report accurately	40
9. Demonstrate how to manage time and assignments	19	8. Explain how to communicate with other team members	41
3 Legal and Ethical Issues			
1. Define the terms <i>law</i> and <i>ethics</i> and list examples of legal and ethical behavior	20	9. Describe basic medical terminology and abbreviations	42
2. Explain the Omnibus Budget Reconciliation Act (OBRA)	21	10. Explain how to give and receive an accurate report of a resident's status	43
3. Explain Residents' Rights and discuss why they are important	23	11. Explain documentation and describe related terms and forms	44
		12. Describe incident reporting and recording	47
		13. Demonstrate effective communication on the telephone	49
		14. Explain the resident call system	49
		15. List guidelines for communicating with residents with special needs	50

Learning Objective **Page**

5 Infection Prevention and Control

1. Define <i>infection prevention</i> and discuss types of infections	58
2. Describe the chain of infection	59
3. Explain why the elderly are at a higher risk for infection	60
4. Explain Standard Precautions	61
5. Explain hand hygiene and identify when to wash hands	63
6. Discuss the use of personal protective equipment (PPE) in facilities	64
7. List guidelines for handling equipment and linen	69
8. Explain how to handle spills	70
9. Explain Transmission-Based Precautions	71
10. Define <i>bloodborne pathogens</i> and describe two major bloodborne diseases	74
11. Explain OSHA's Bloodborne Pathogens Standard	75
12. Define <i>tuberculosis</i> and list infection prevention guidelines	76
13. Discuss COVID-19 and identify care guidelines	78
14. Discuss MRSA, VRE, and <i>C. difficile</i>	80
15. List employer and employee responsibilities for infection prevention	81

6 Safety and Body Mechanics

1. Identify the persons at greatest risk for accidents and describe accident prevention guidelines	83
2. List safety guidelines for oxygen use	87
3. Explain the Safety Data Sheet (SDS)	87
4. Define the term <i>restraint</i> and give reasons why restraints were used	88
5. List physical and psychological problems associated with restraints	89
6. Discuss restraint alternatives	89
7. Describe guidelines for what must be done if a restraint is ordered	90
8. Explain the principles of body mechanics	90

Learning Objective **Page**

9. Apply principles of body mechanics to daily activities	92
10. Identify major causes of fire and list fire safety guidelines	93

7 Emergency Care and Disaster Preparation

1. Demonstrate how to recognize and respond to medical emergencies	96
2. Demonstrate knowledge of first aid procedures	97
3. Describe disaster guidelines	107

8 Human Needs and Human Development

1. Identify basic human needs	110
2. Define <i>holistic care</i> and explain its importance in health care	111
3. Explain why independence and self-care are important	111
4. Describe sexual orientation and gender identity and explain ways to accommodate sexual needs	113
5. Identify ways to help residents meet their spiritual needs	115
6. Identify ways to accommodate cultural and religious differences	116
7. Describe the need for activity	119
8. Discuss family roles and their significance in health care	120
9. List ways to respond to emotional needs of residents and their families	121
10. Describe the stages of human growth and development and identify common disorders for each stage	122
11. Distinguish between what is true and what is not true about the aging process	126
12. Explain developmental disabilities and list care guidelines	128
13. Identify community resources available to help the elderly and people who are developmentally disabled	130

<i>Learning Objective</i>	<i>Page</i>
---------------------------	-------------

9 The Healthy Human Body

1. Describe body systems and define key anatomical terms	132
2. Describe the integumentary system	133
3. Describe the musculoskeletal system	134
4. Describe the nervous system	136
5. Describe the circulatory system	139
6. Describe the respiratory system	141
7. Describe the urinary system	142
8. Describe the gastrointestinal system	143
9. Describe the endocrine system	145
10. Describe the reproductive system	146
11. Describe the immune and lymphatic systems	149

10 Positioning, Transfers, and Ambulation

1. Review the principles of body mechanics	151
2. Explain positioning and describe how to safely position residents	152
3. Describe how to safely transfer residents	160
4. Discuss how to safely assist residents with ambulation	170

11 Admitting, Transferring, and Discharging

1. Describe how residents may feel when entering a facility	175
2. Explain the nursing assistant's role in the admission process	176
3. Explain the nursing assistant's role during an in-house transfer of a resident	181
4. Explain the nursing assistant's role in the discharge of a resident	182
5. Describe the nursing assistant's role in physical exams	184

<i>Learning Objective</i>	<i>Page</i>
---------------------------	-------------

12 The Resident's Unit

1. Explain why a comfortable environment is important for the resident's well-being	187
2. Describe a standard resident unit	188
3. Discuss how to care for and clean unit equipment	190
4. Explain the importance of sleep and factors affecting sleep	191
5. Describe bedmaking guidelines and perform proper bedmaking	191

13 Personal Care Skills

1. Explain personal care of residents	198
2. Identify guidelines for providing skin care and preventing pressure injuries	200
3. Explain guidelines for assisting with bathing	204
4. Explain guidelines for assisting with grooming	215
5. List guidelines for assisting with dressing	221
6. Identify guidelines for proper oral care	223
7. Explain how to care for dentures and describe dental implants and fixed bridges	227

14 Basic Nursing Skills

1. Explain the importance of monitoring vital signs	230
2. List guidelines for measuring body temperature	231
3. List guidelines for measuring pulse and respirations	237
4. Explain guidelines for measuring blood pressure	240
5. Describe guidelines for pain management	243
6. Explain the benefits of warm and cold applications	245
7. Discuss nonsterile and sterile dressings	251
8. Discuss guidelines for elastic bandages	253
9. List care guidelines for intravenous (IV) therapy	253
10. Discuss oxygen therapy and explain related care guidelines	255

Learning Objective **Page**

15 Nutrition and Hydration

1. Describe the importance of proper nutrition and list the six basic nutrients	259
2. Describe the USDA's MyPlate	260
3. Identify nutritional problems of the elderly or ill	263
4. Describe factors that influence food preferences	266
5. Explain the role of the dietary department	267
6. Explain special diets	267
7. Explain thickened liquids and texture-modified foods	271
8. Describe how to make dining enjoyable for residents	272
9. Explain different dining styles and describe how to serve meal trays	273
10. Describe how to assist residents with special needs	277
11. Define <i>dysphagia</i> and identify signs and symptoms of swallowing problems	279
12. Explain intake and output (I&O)	280
13. Identify ways to assist residents in maintaining fluid balance	282

16 Urinary Elimination

1. List qualities of urine and identify signs and symptoms about urine to report	287
2. List factors affecting urination and demonstrate how to assist with elimination	287
3. Describe common diseases and disorders of the urinary system	293
4. Describe guidelines for urinary catheter care	296
5. Identify types of urine specimens that are collected	300
6. Explain types of tests performed on urine	304
7. Explain guidelines for assisting with bladder retraining	305

Learning Objective **Page**

17 Bowel Elimination

1. List qualities of stool and identify signs and symptoms about stool to report	307
2. List factors affecting bowel elimination	307
3. Describe common diseases and disorders of the gastrointestinal system	309
4. Discuss how enemas are given	311
5. Demonstrate how to collect a stool specimen	316
6. Explain fecal occult blood testing	317
7. Define <i>ostomy</i> and list care guidelines	318
8. Explain guidelines for assisting with bowel retraining	321

18 Common Chronic and Acute Conditions

1. Describe common diseases and disorders of the integumentary system	323
2. Describe common diseases and disorders of the musculoskeletal system	325
3. Describe common diseases and disorders of the nervous system	332
4. Describe common diseases and disorders of the circulatory system	337
5. Describe common diseases and disorders of the respiratory system	342
6. Describe common diseases and disorders of the endocrine system	345
7. Describe common diseases and disorders of the reproductive system	349
8. Describe common diseases and disorders of the immune and lymphatic systems	351
9. Identify community resources for residents who are ill	357

19 Confusion, Dementia, and Alzheimer's Disease

1. Describe normal changes of aging in the brain	360
2. Discuss confusion and delirium	360

<i>Learning Objective</i>	<i>Page</i>
3. Describe dementia and define related terms	361
4. Describe Alzheimer's disease and identify its stages	362
5. Identify personal attitudes helpful in caring for residents with Alzheimer's disease	363
6. List strategies for better communication with residents with Alzheimer's disease	365
7. Explain general principles that will help assist residents with personal care	367
8. List and describe interventions for problems with common activities of daily living (ADLs)	367
9. List and describe interventions for common difficult behaviors related to Alzheimer's disease	370
10. Describe creative therapies for residents with Alzheimer's disease	375
11. Discuss how Alzheimer's disease may affect the family	376
12. Identify community resources available to people with Alzheimer's disease and their families	377
20 Mental Health and Mental Health Disorders	
1. Identify seven characteristics of mental health	379
2. Identify four causes of mental health disorders	379
3. Distinguish between fact and fallacy concerning mental health disorders	380
4. Explain the connection between mental and physical wellness	380
5. List guidelines for communicating with residents who have a mental health disorder	381
6. Identify and define common defense mechanisms	381
7. Describe types of mental health disorders	381
8. Explain how mental health disorders are treated	383
9. Explain the nursing assistant's role in caring for residents who have a mental health disorder	384
10. Identify important observations that should be made and reported	384
11. List the signs of substance abuse	385

<i>Learning Objective</i>	<i>Page</i>
21 Rehabilitation and Restorative Care	
1. Discuss rehabilitation and restorative care	387
2. Describe the importance of promoting independence and list ways that exercise improves health	389
3. Describe assistive devices and equipment	390
4. Explain guidelines for maintaining proper body alignment	391
5. Explain care guidelines for prosthetic devices	392
6. Describe how to assist with range of motion exercises	393
7. Describe the benefits of deep breathing exercises	398
22 Special Care Skills	
1. Understand the types of residents who are in a subacute setting	400
2. Discuss reasons for and types of surgery	400
3. Discuss preoperative care	401
4. Describe postoperative care	402
5. List care guidelines for pulse oximetry	404
6. Describe telemetry and list care guidelines	404
7. Explain artificial airways and list care guidelines	405
8. Discuss care for a resident with a tracheostomy	406
9. List care guidelines for residents requiring mechanical ventilation	407
10. Describe suctioning and list signs of respiratory distress	408
11. Describe chest tubes and explain related care	408
23 Dying, Death, and Hospice	
1. Discuss the stages of grief	410
2. Describe the grief process	411
3. Discuss how feelings and attitudes about death differ	411
4. Discuss how to care for a resident who is dying	412

Learning Objective	Page
5. Describe ways to treat dying residents and their families with dignity and how to honor their rights	414
6. Define the goals of a hospice program	415
7. Explain common signs of approaching death	417
8. List changes that may occur in the human body after death	417
9. Describe postmortem care	417
10. Understand and respect different postmortem practices	419

24 Caring for Your Career and Yourself

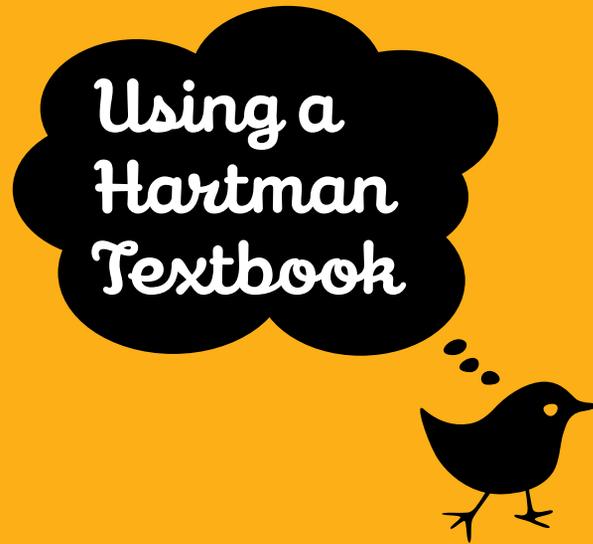

1. Discuss different types of careers in the healthcare field	421
2. Explain how to find a job and how to write a résumé	422
3. Demonstrate completing an effective job application	423
4. Demonstrate competence in job interview techniques	425
5. Describe a standard job description	426
6. Discuss how to manage and resolve conflict	427
7. Describe employee evaluations and discuss appropriate responses to feedback	427
8. Explain how to make job changes	428
9. Discuss certification and explain the state's registry	429
10. Describe continuing education	429
11. Define <i>stress</i> and <i>stressors</i>	430
12. Explain ways to manage stress	430
13. Describe a relaxation technique	432
14. List ways to remind yourself of the importance of the work you have chosen to do	432
Abbreviations	434
Appendix: Basic Math Skills	437
Glossary	439
Index	459

Procedures

Washing hands (hand hygiene)	64
Putting on (donning) and removing (doffing) gown	65
Putting on (donning) mask and goggles	66
Putting on (donning) gloves	67
Removing (doffing) gloves	68
Donning a full set of PPE	68
Doffing a full set of PPE	69
Performing abdominal thrusts for the conscious person	98
Responding to shock	99
Responding to a myocardial infarction	100
Controlling bleeding	100
Treating burns	101
Responding to fainting	102
Responding to a nosebleed	103
Responding to a seizure	104
Responding to vomiting	106
Moving a resident up in bed	154
Moving a resident to the side of the bed	155
Positioning a resident on his side	156
Logrolling a resident	157
Assisting a resident to sit up on side of bed: dangling	158
Applying a transfer belt	160
Transferring a resident from bed to wheelchair	163
Transferring a resident from bed to stretcher	165
Transferring a resident using a mechanical lift	166
Transferring a resident onto and off of a toilet	168
Transferring a resident into a vehicle	169
Assisting a resident to ambulate	170
Assisting with ambulation for a resident using a cane, walker, or crutches	172

Admitting a resident	178
Measuring and recording weight of an ambulatory resident	179
Measuring and recording height of an ambulatory resident	180
Transferring a resident	182
Discharging a resident	183
Making an occupied bed	192
Making an unoccupied bed	195
Making a surgical bed	196
Giving a complete bed bath	205
Giving a back rub	209
Shampooing hair	211
Giving a shower or tub bath	213
Providing fingernail care	215
Providing foot care	217
Shaving a resident	218
Combing or brushing hair	220
Dressing a resident	222
Providing oral care	224
Providing oral care for an unconscious resident	225
Flossing teeth	225
Cleaning and storing dentures	227
Measuring and recording an oral temperature	233
Measuring and recording a rectal temperature	234
Measuring and recording a tympanic temperature	235
Measuring and recording an axillary temperature	236
Counting and recording apical pulse	238
Counting and recording radial pulse and counting and recording respirations	239
Measuring and recording blood pressure manually	241
Measuring and recording blood pressure electronically	243
Applying warm compresses	246
Administering warm soaks	247
Applying an Aquamatic K-Pad	248

<i>Procedure</i>	<i>Page</i>
Assisting with a sitz bath	249
Applying ice packs	250
Applying cold compresses	250
Changing a dry dressing using nonsterile technique	251
Assisting in changing clothes for a resident who has an IV	254
Feeding a resident	276
Measuring and recording intake and output	281
Serving fresh water	284
Assisting a resident with the use of a bedpan	289
Assisting a male resident with a urinal	291
Assisting a resident to use a portable commode or toilet	292
Providing catheter care	297
Emptying the catheter drainage bag	298
Changing a condom catheter	299
Collecting a routine urine specimen	301
Collecting a clean-catch (midstream) urine specimen	302
Collecting a 24-hour urine specimen	303
Testing urine with reagent strips	305
Giving a cleansing enema	312
Giving a commercial enema	314
Collecting a stool specimen	316
Testing a stool specimen for occult blood	318
Caring for an ostomy	320
Putting elastic stockings on a resident	341
Collecting a sputum specimen	345
Providing foot care for a resident with diabetes	348
Assisting with passive range of motion exercises	394

Understanding how this book is organized and what its special features are will help you make the most of this resource!

We have assigned each chapter its own colored tab. Located on the side of every page, each colored tab contains the chapter number and title.

1. List examples of legal and ethical behavior

Everything in this book, the student workbook, and the instructor’s teaching material is organized around learning objectives. A learning objective is a very specific piece of knowledge or a very specific skill. After reading the text, if you can do what the learning objective says, you know you have mastered the material.

bloodborne pathogens

Bold key terms are located throughout the text, followed by their definitions. They are also listed in the glossary at the back of this book.

Making an occupied bed

All care procedures are highlighted by a black bar for easy recognition.

This icon indicates that Hartman Publishing offers a corresponding video for this skill.

Guidelines: Handwashing

Guidelines and Observing and Reporting lists are colored green for easy reference.

Residents’ Rights
Food Choices

Blue Residents’ Rights boxes teach important information about how to support and promote legal rights and person-centered care.

Chapter Review

Chapter-ending questions test your knowledge of the information found in the chapter. If you have trouble answering a question, you can return to the text and reread the material.

Beginning and ending steps in care procedures

For most care procedures, these beginning and ending steps should be performed. Understanding why they are important will help you remember to perform each step every time care is provided.

Beginning Steps

Identify yourself by name. Identify the resident according to facility policy.

A resident's room is his home. Residents have a legal right to privacy. Before any procedure, knock and wait for permission to enter the resident's room. Upon entering his room, identify yourself and state your title. Residents have the right to know who is providing their care. Identify and greet the resident. This shows courtesy and respect. It also establishes correct identification. This prevents care from being performed on the wrong person.

Wash your hands.

Handwashing provides for infection prevention. Nothing fights infection in facilities like performing consistent, proper hand hygiene. Handwashing may need to be done more than once during a procedure. Practice Standard Precautions with every resident.

Explain the procedure to the resident. Speak clearly, slowly, and directly. Maintain face-to-face contact whenever possible.

Residents have a legal right to know exactly what care you will provide. This promotes understanding, cooperation, and independence. Residents are able to do more for themselves if they know what needs to happen.

Provide for the resident's privacy with a curtain, screen, or door.

Doing this maintains residents' rights to privacy and dignity. Providing for privacy in a facility is not simply a courtesy; privacy is a legal right.

Adjust the bed to a safe level, usually waist high. Lock the bed wheels.

Locking the bed wheels is an important safety measure. It ensures that the bed will not move as you are performing care. Raising the bed helps you to remember to use proper body mechanics. This helps prevent injury to you and to residents.

Ending Steps

-
- Make the resident comfortable.** Make sure the sheets are wrinkle-free and lie flat under the resident's body. This helps prevent pressure injuries. Replace bedding and pillows. Check that the resident's body is in proper alignment. This promotes comfort and health after you leave the room.
-
- Return the bed to its lowest position.** Lowering the bed provides for the resident's safety. Remove extra privacy measures added during the procedure. This includes anything you may have draped over and around the resident, as well as privacy screens.
- Remove privacy measures.**
-
- Place the call light within the resident's reach.** A call light allows the resident to communicate with staff as necessary. It must always be left within reach of the resident's stronger hand. You must respond to call lights promptly.
-
- Wash your hands.** Handwashing is the most important thing you can do to prevent the spread of infection.
-
- Report any changes in the resident to the nurse. Document the procedure using facility guidelines.** You will often be the person who spends the most time with a resident, so you are in the best position to note any changes in a resident's condition. Every time you provide care, observe the resident's physical and mental capabilities, as well as the condition of the resident's body. For example, a change in a resident's ability to dress himself may signal a greater problem. After you have finished giving care, document the care using facility guidelines. Do not record care before it is given. If you do not document the care you gave, legally it did not happen.

In addition to the beginning and ending steps listed above, remember to follow infection prevention guidelines. Even if a procedure in this book does not tell you to wear gloves or other PPE, there may be times when it is appropriate.

For example, the procedure for giving a back rub does not include gloves. Gloves are usually not required for a back rub. However, if the resident has open sores on his back, gloves are necessary.
